CHALLENGE

Website suddenly went down

Their website is a critical element of their business since they receive over 60% of their monthly revenue based on new visits to their website. Therefore, every minute their website is down means they are losing money!

SOLUTION

No Hassle Webmaster Service + Guaranteed Virus Removal

We proposed a solution for Fast Freight Forwarding & Co. that their website requires maintenance on a regular basis to ensure optimal performance and security.

So No Hassle Webmaster Service and Virus Removal was the solution we came up with to prevent the website from going down or becoming very slow.

RESULT

Virus was removed within 12 hours time and the website was restored to normal working condition.

In addition, to ensure this never happens again, they decide to purchase our No Hassle Webmaster Service that takes care of everything to do with maintaining your website and ensure it is always working.

Fast forward to more than 2 years later, they are still very happy with their results and can sleep well at night knowing that their website will still be working well for them in the morning.
